# Hazardous Weather

# Hazardous Weather

A cold front will move through the Rolling Plains and stall across the eastern parts of the Caprock today. Cool and cloudy conditions are expected across the Rolling Plains with a chance of rain showers in the late morning to early afternoon hours. Rain showers will move off to the northeast quickly, with little in the way of meaningful rain. A few rumbles of thunder will be possible as well. Across the South Plains and extreme southwestern Texas Panhandle, strong winds, low relative humidity, and warm temperatures will result in critical fire weather conditions developing this afternoon.

A Red Flag Warning is in effect for the Caprock this afternoon between 12 PM and 8 PM CST. Critical fire weather conditions are expected to develop due to the combination of strong, west-southwest winds between 20-35 mph at the 20 ft level; low relative humidity, and warm temperatures. Patchy, extremely critical fire weather conditions will be possible across the southwestern South Plains as well. Outdoor burning and/or activities involving sparks and flames is highly discouraged.

# Hazardous Weather

## Strong Storms Sunday Night

Weather Forecast Office  
Fort Worth, TX  
Issued March 05, 2022 4:55 PM CT

A cold front will be moving from northwest to southeast Sunday Night. Strong to marginally severe storms are possible in the yellow shaded area, with the primary threat being strong winds and hail.

### Timing:

- Storms will develop around 10pm along the front.
- A few post-frontal storms may develop behind the front through around sunrise.

### Threats:

Higher

Large Hail Wind Tornado Flooding

f NWSFortWorth

weather.gov/fortworth

A cold front will be moving through North and Central Texas Sunday Night, leading to the development of scattered showers and thunderstorms. A few storms may be strong to marginally severe. The main threat will be strong winds with storms along the cold front, but a few hailers cannot be ruled out both along and behind the cold front.

## Severe Risk - Tonight

Weather Forecast Office  
Shreveport, LA  
Issued March 6, 2022 2:09 AM CT

### Tornado Potential

70 - 80 mph

60 - 70 mph

f NWSShreveport

weather.gov/shv

Severe thunderstorms may be possible across the I-30 corridor into southeast Oklahoma tonight.

# Hazardous Weather

**A Red Flag Warning is in effect for much of the region due to critical to extreme fire weather conditions. Avoid outdoor burning, open flames, and activities that generate sparks.**

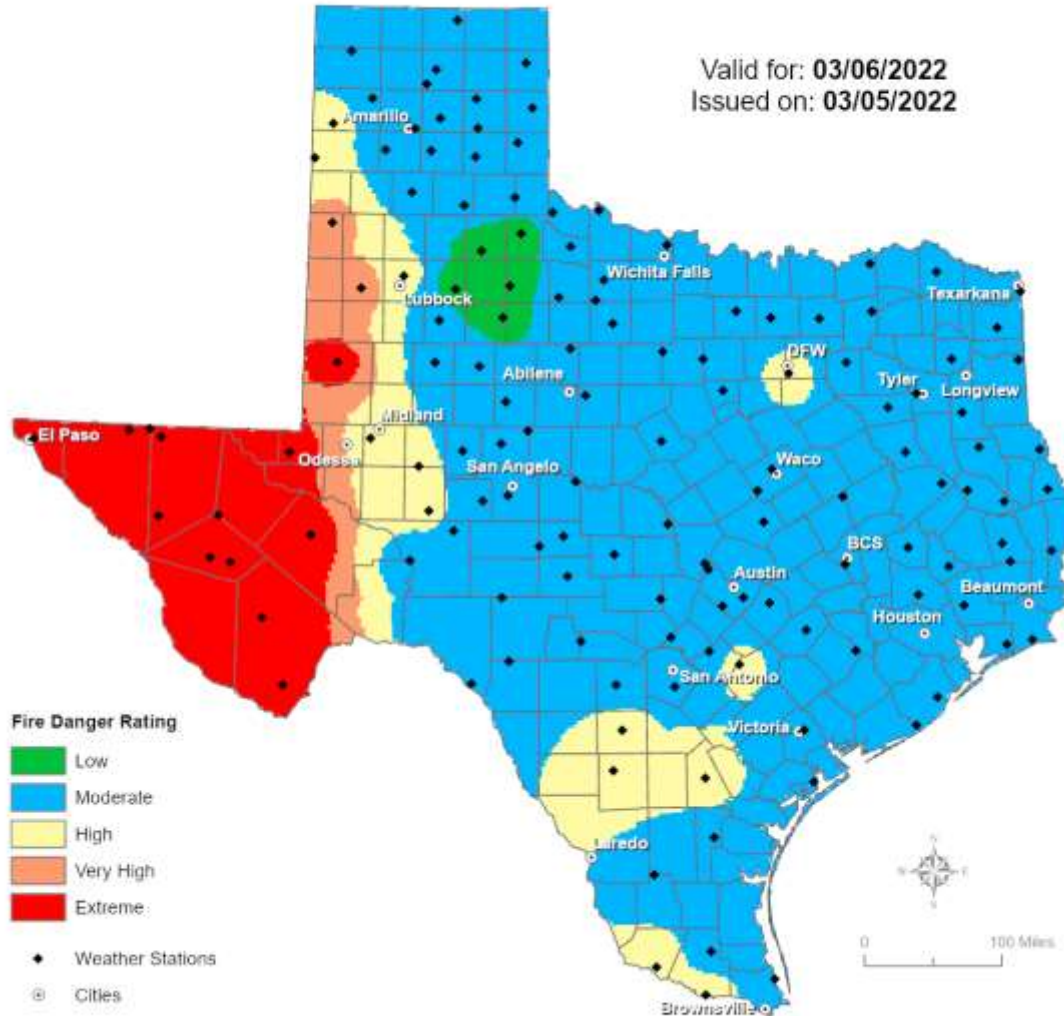

**High fire danger is expected on Sunday due to strong winds and low relative humidity. A Red Flag Warning is in effect.**
